Smart grids, messy society

A/Prof Heather Lovell, UTAS

Presented in conjunction with  UNIVERSITY of
TASMANIA

The ROYAL SOCIETY of TASMANIA

the advancement of knowledge

**Interested in new ideas?
Want to hear about recent discoveries?**

The Royal Society of Tasmania provides regular opportunities for members of the public to hear directly from leading researchers including scientists and historians. The Society offers monthly lectures on topics of current interest in the community.

Lectures are open to absolutely anyone and we expect that they will be enjoyed by anyone with an interest in hearing and discussing new ideas. The annual Winter Lecture Series is a highlight of the year, as is the annual postgraduate students' night when leading young Tasmanian researchers present their work.

Most Hobart lectures occur in the Society's lecture room in the TMAG building, accessed off the carpark near to Davey Street. Launceston lectures occur at QVMAG Inveresk

Where can I get more information?

More information about the Society, details of lectures, events, and membership forms can be found on our website: www.rst.org.au
